(c) Computerised Application Systems performing Government functions are developed, keeping different levels of security in place, as per the requirements:

(i) Physical security for the computers storing the sensitive data is in place, as prescribed by standard govt. procedures.

(ii) Only authorized users are allowed to access the data as per the permissions granted.

(iii) Steps are taken for performing penetration tests before applications being made available to the public/users.

(iv) Critical Applications have additional authentication through digital signatures through which encruption of data during transmission/ storage takes place.

(v) The data is kept in secure zones protected using state-of-art technologies, such as, firewalls, intrusion prevention system etc. and on secured servers.

(vi) Access control measures, such as, Virtual Private Network (VPN)/ Secure Socket Layer (SSL) for authenticated and secure content updation are in place.

(vii) Latest security patches for the vulnerabilities on the system and application software and applied.

(viii) Through regular application security audit and Operating System (OS) hardening procedures, the application code, the associated procedures and policies and the functional controls are checked.

Thus all possible steps are being taken to minimise the possibility of tempering and e-fraud of data on computerized systems.

Purchase of SIM cards by naxalites

157. SHRI DATTA MEGHE: Will the Minister of COMMUNICATIONS AND INFORMATION TECHNOLOGY be pleased to state:

(a) whether it has come to the notice of the Government that naxalites have procured 400 SIM cards from Bharat Sanchar Nigam Limited (BSNL);
